- Anti-aging and deeply hydrating
- Kickstart Collagen and Elastin production
- Rich blend of natural oils to plump & lift the skin
- Colostrum to promote skin cell repair & renewal
- Made in New Zealand
- Pure New Zealand Bee Venom

EMBELLISHED WITH NATURAL EXOTIC OILS

Jojoba Oil: Jojoba oil contains many vitamins and minerals essential to healthy skin including vitamin E, B-complex, copper, zinc, selenium, iodine and chromium.

Jojoba oil is also packed full of fatty acids which help fight skin inflammation, increase skin hydration and are anti-aging.

Almond Oil: Almond oil has generous amounts of monounsaturated fatty acids, vitamin E, potassium, proteins, zinc, and a number of other vitamins and minerals. All combine to give incredible moisture,

delay signs of aging and give your skin a healthy glow.

Macadamia Oil: Healing, repairing, hydrating and rich in essential fatty acids Macadamia oil is an incredible ingredient to delay skin aging.

Macadamia Oil is super-charged with antioxidants, to help to fight fine lines and wrinkles.

Manuka Honey: Renowned worldwide for its natural antiseptic and antibacterial properties, manuka honey retains moisture without making skin oily. It naturally draws moisture into the skin. This hydration helps to further enhance the skin's elasticity and cell regeneration, as well as promote healing.

Perfect for healing, balancing and replenishing the skin.

Evening Primrose Oil: Packed with Omega-6 fatty acids, crucial for healthy skin Evening Primrose oil has many anti-inflammatory and healing properties. It contains a high concentration of gamma-linolenic acid

which helps to deliver moisture for lasting hydration and also provides vital nutrients that are essential to healthy complexions. With a high level of antioxidants, it's great for reducing fine lines and smoothing skin texture.

Shea Butter: Shea butter contains five essential fatty acids with vitamins E, D, and A. This combination of ingredients helps neutralise free radical damage, reducing fine lines and the appearance of age spots.

The collagen boosting properties of shea butter make it an excellent product to help reduce the appearance of aging.

BEE VENOM WHAT'S THE BUZZ ABOUT?

Nature's alternative to botox

As skin ages, it loses its naturally-occurring collagen which results in sagging skin and fine lines and wrinkles. Applying small amounts of bee venom cream to the skin fools it into thinking it has been stung. Blood is sent to the affected area, which stimulates the production of naturally occurring collagen and elastin, which helps the skin stay firm and youthful.

Along with the immediate tightening effect, regular users can notice a number of benefits including improved skin texture and firmness, the reduction of pores, fine lines and wrinkles.

Bee Venom also has shown promising effects against acne with significant antimicrobial and anti-inflammatory effects.

HAPPY NEW ZEALAND BEES

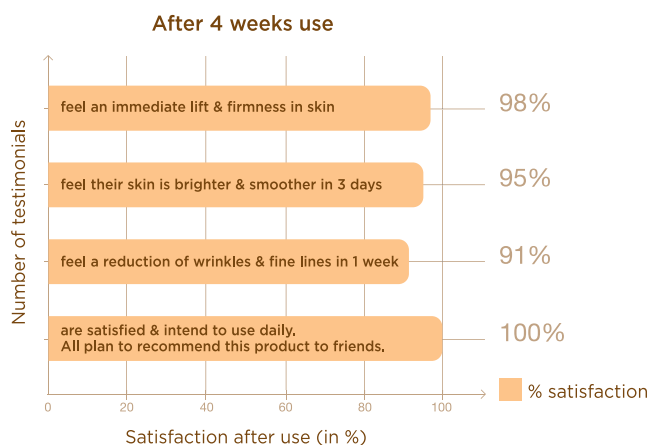

No Bees are Harmed!

Collecting bee venom is not harmful or stressful for the bees. The bee lands on a glass pane with a very weak electrical current running through it. When the bee sits on the glass, the weak current encourages them to stick out their stingers and pump out a small amount of venom which is then collected and purified.

THE RESULTS

This graph shows a satisfaction test in men and women after using **Alpha Lipid™ Bee Venom Intensive Anti-Aging Moisturising Cream** for 4 weeks. Results shown below:

Satisfaction outcome in women

98% feel skin immediately lifted and firmer

100% satisfied and intend to use daily

All those tested plan to recommend this product to friends

MADE IN NEW ZEALAND

With Alpha Lipid™ Colostrum

The New Image™ skincare range are the only products to contain **New Zealand's Alpha Lipid™ Colostrum** which provides TGF (Transforming Growth Factors) to promote skin cell repair and renewal.

Our patented Alpha Lipid™ system ensures delivery to where it can make the most difference, penetrating deeply - stimulating cell growth and improving skin thickness and elasticity.

Alpha Lipid™ Colostrum's powerful actives promote the appearance of revitalised, hydrated skin.

New generation skin care originating in New Zealand - a country with a worldwide reputation for pure and natural ingredients.

SAFETY

Generally speaking, bee venom cream is safe to use unless you have a severe allergy to bees. We recommend you test on a small area of skin before first use and wait 20 minutes. If there are no adverse effects then continue applying to your face. Everyone's skin is unique so you might experience a slight tingling sensation which is normal.
